Volume Contents

Volume 14 Number 1

A. R. Aftabizadeh, Jian-Ming Xu and C. P. Gupta	1	Periodic boundary value problems for third order ordinary differential equations
B. D'Onoforio and I. Ekeland	11	Hamiltonian systems with elliptic periodic orbits
O. Arino and M. L. Hbid	23	Periodic solutions for retarded differential systems close to ordinary ones
P. Takáč	35	Asymptotic behavior of discrete-time semigroups of sublinear, strongly increasing mappings with applications to biology
M. Taboada	43	Finite-dimensional asymptotic behavior for the Swift–Hohenberg model of convection
H. Tanaka	55	Harmonic boundaries of Riemannian manifolds
N. Mizoguchi and W. Takahashi	69	On the existence of fixed points and ergodic retractions for Lipschitzian semigroups in Hilbert spaces
L. Boccardo and T. Gallouët	81	Homogenization for "Castro–Lazer Equation"
Software Survey Section	I	

Volume 14 Number 2

A. Friedman and M. A. Herrero	93	A nonlinear nonlocal wave equation arising in combustion theory
L. A. Peletier and Zhao Junning	107	Source-type solutions of the porous media equation with absorption: the fast diffusion case
F. Alabau	123	Uniform asymptotic error estimates for semiconductor device and electrochemistry equations
Xiangsheng Xu	141	A nonlinear degenerate parabolic equation
Byung Gai Kang and Sehie Park	159	On generalized ordering principles in nonlinear analysis

R. H. MARTIN, JR and M. E. OXLEY 167 Moving boundaries in reaction–diffusion systems with absorption

SOFTWARE SURVEY SECTION I

Volume 14 Number 3

A. M. FINK 193 ATauberian approach to asymptotic stability of competition equations

D. E. JACKSON 201 Existence and regularity for the FitzHugh–Nagumo equations with inhomogeneous boundary conditions

M. VALÈNCIA 217 On invariant regions and asymptotic bounds for semilinear partial differential equations

G. A. HARRIS 231 An extension of a theorem on semilinear elliptic problems

M. NAKAO 251 A bifurcation problem for a quasi-linear elliptic boundary value problem

F. GIANNONI 263 Periodic bounce solutions of dynamical conservative systems and their minimal period

W. KOTARSKI 287 On some specification of the Dubovicki–Milutin theorem for Pareto optimal problems

SOFTWARE SURVEY SECTION I

Volume 14 Number 4

GUO BEN-YU, C. ROGERS and D. SIEGEL 293 Application to maximum principles to boundary value problems in nonlinear heat conduction

R. A. POLIQUIN 305 Subgradient monotonicity and convex functions

J. W. MACKI, P. NISTRI and P. ZECCA 319 A tracking problem for uncertain vector systems

F. CONRAD and F. ISSARD-ROCH 329 Loss of stability at turning points in nonlinear elliptic variational inequalities

B. KAŚKOSZ 357 A maximum principle in relaxed controls

J. R. HADDOCK, T. KRISZTIN and JIANHONG WU 369 Asymptotic equivalence of neutral and infinite retarded differential equations

L. H. Erbe and Qingkai Kong 379 On Olech–Opial–Wazewski oscillation criteria for second order nonlinear equations

Software Survey Section I

Volume 14 Number 5

D. Arcoya and A. Cañada 393 Critical point theorems and applications to nonlinear boundary value problems

S. Heikkilä 413 On fixed points through a generalized iteration method with applications to differential and integral equations involving discontinuities

R. van der Hout 427 A travelling wave solution for a one-dimensional Stefan problem

E. N. Dancer 441 Certain weakly nonlinear partial differential equations on annuli

L. E. Payne and B. Straughan 443 Error estimates for the temperature of a piece of cold ice, given data on only part of the boundary

Jiang Ji-Fa 453 On the asymptotic behavior of a class of nonlinear differential equation

Software Survey Section I

Volume 14 Number 6

H. Okamoto 469 On the problem of water waves of permanent configuration

R. Torrejón 483 A note on a nonlinear integral equation from the theory of epidemics

S. Solimini 489 On forced dynamical systems with a singularity of repulsive type

G. M. Lieberman 501 Boundary regularity for solutions of degenerate parabolic equations

G. M. LIEBERMAN 525 Initial regularity for solutions of degenerate parabolic equations

M. KOVALYOV 537 Decay estimates for the solutions of the non-Euclidean wave-equations

SOFTWARE SURVEY SECTION I

Volume 14 Number 7

G. MARINO 545 Nonlinear boundary value problems for multivalued differential equations in Banach spaces

A. ALVINO, P. BUONOCORE and G. TROMBETTI 559 On Dirichlet problem for second order elliptic equations

M. BERTSCH and M. UGHI 571 Positivity properties of viscosity solutions of a degenerate parabolic equation

E. MASCOLO 593 Local minima of nonconvex problems

ADIMURTHI and S. L. YADAVA 607 Bifurcation results for semilinear elliptic problems with critical exponent in $\mathbb{R}^2$

Volume 14 Number 8

D. C. PEREIRA 613 Existence, uniqueness and asymptotic behavior for solutions of the nonlinear beam equation

H. W. ALT and C. J. VAN DUIJN 625 A stationary flow of fresh and salt groundwater in a coastal aquifer

M. A. POZIO and A. TESEI 657 Global existence of solutions for a strongly coupled quasilinear parabolic system

JUNYU WANG 691 A free boundary problem for a generalized diffusion equation

P. DORMAYER 701 The stability of special symmetric solutions of $\dot{x}(t) = \alpha f(x(t-1))$ with small amplitudes

SOFTWARE SURVEY SECTION I

Volume 14 Number 9

V. CHIADÒ PIAT and A. DEFRANCESCHI 717 Homogenization of monotone operators

T. J. BRIDGES and F. DIAS 733 An analysis of two-dimensional water waves based on O(2) symmetry

T. OGAWA 765 A proof of Trudinger's inequality and its application to nonlinear Schrödinger equations

H. OKOCHI 771 On the existence of anti-periodic solutions to nonlinear parabolic equations in noncylindrical domains

ADIMURTHI and S. L. YADAVA 785 Elementary proof of the nonexistence of nodal solutions for the semilinear elliptic equations with critical Sobolev exponent

T. SENBA 789 On the support properties of solutions for some degenerate quasilinear parabolic systems

SOFTWARE SURVEY SECTION I

Volume 14 Number 10

T. CAZENAVE and F. B. WEISSLER 807 The Cauchy problem for the critical nonlinear Schrödinger equation in H^s

A. AUGUSTYNOWICZ and Z. KAMONT 837 On Kamke's functions in uniqueness theorems for first order partial differential–functional equations

C. T. KELLEY and J. RULLA 851 Solution of the time discretized Stefan problem by Newton's method

R. LEWANDOWSKI 873 Little holes and convergence of solutions of $-\Delta u = u^{(N+2)/(N-2)}$

M. SCHECHTER 889 Nonlinear elliptic boundary value problems at resonance

SOFTWARE SURVEY SECTION I

Volume 14 Number 11

I. R. IONESCU and I. ROSCA 905 Friedrichs extensions for nonconvex variational problems

G. HETZER and P. G. SCHMIDT 915 A global attractor and stationary solutions for a reaction–diffusion system arising from climate modeling

J. BANAŚ 927 On drop property and nearly uniformly smooth Banach spaces

M. A. KHAMSI, W. M. KOZLOWSKI and S. REICH — 935 — Fixed point theory in modular function spaces

K. MISCHAIKOW and G. WOLKOWICZ — 955 — A predator–prey system involving group defense: a connection matrix approach

E. N. BARRON — 971 — Differential games with maximum cost

A. BÉNICHOU and J.-B. POMET — 991 — The index of the radial solution of some elliptic P.D.E.

ERRATA — 999

SOFTWARE SURVEY SECTION — I

Volume 14 Number 12

D. O'REGAN — 1001 — Fourth (and higher) order singular boundary value problems

G. KARAKOSTAS — 1039 — On a one-parameter family of delay population equations

W. RUAN — 1051 — Bounded solutions for reaction–diffusion systems with nonlinear boundary conditions

J.-P. GOSSEZ and P. OMARI — 1079 — Nonresonance with respect to the Fučik spectrum for periodic solutions of second order ordinary differential equations

K. DEIMLING and V. LAKSHMIKANTHAM — 1105 — Multivalued differential inequalities

S. SIMONS — 1111 — The occasional distributivity of $\circ$ over $\dot{+}$ and the change of variable formula for conjugate functions
